CONSCIENCE MONEY.

What the Old Time Publishers Paid

From a Sense of Justice. Some interesting details have been given out lately us to the sums voluntarily paid to British novelists by American publishers before the days of international copyright. Any American firm could reprint at once whatever issued from the English pressus, but some publishers arranged with British authors for advance sheets of forthcoming works, thus enabling them to get the start of "piratical" firms which paid the author nothing. It is interesting to observe the occusional disparity between the merit of the book and the price paid. The whole thing was in the nature of a leap in the dark. Often the sum given by the American pablisher was really more than the American rights would probably have been worth had it been possible to secure them by copyright. Thus Anthony Trollope got \$3,500 for "Sir flarry Hotone of his poorest novels; George Ellot \$8,500 for "Daniel Derouda" and Charles Reade \$5,000 for "A Woma's Hater." No publisher today would pay any such sums for these book, if he were permitted to read them before

On the other hand, by way of com parison, the very best books brought their authors only trifling returns from America. Charles Reade received only \$250 for "Put Yourself In Itis Place." \$1,000 for "Hard Cash," these being (wa of his finest novels, and \$1,000 for Love Me Little, Love Me Long. Thackeray got only \$750 for "The Newcomes" and \$500 for "Lieury Estnord." Trollope obtained from the Harpers \$125 for "The Bertrams." \$250 for Testle Richmond," \$5en for "Phineses Pins," \$250 for "The Emstace Diamonds," "Orley carm," "Lady Anna" and "Ralph the Heir." The \$500 for his "Cicero" is fully as much as any American publisher would give today for the copyright of such a book. George Eliot rewived only \$100 for Adam Bede" and \$500 for "Silas Mar-"The Mill on the Flora" brought her \$1.500.

Wilkle Collins and Divisons were the most popular authors of the precopyright period, and they fared best of all at the hands of their authorized Amerlean publishers. The former drew from this country \$1,800 for "The Woman In \$3,750 each for "The Moonstone" and "Man and Wife" and \$1,000 "Poor Miss Finch." To Dickens. the Harpers paid \$1,250 for "Little Dorrit," \$1.800 for Bleak House, \$5,000 each for "Our Mutual Friend" and "A Tale of Two Cities" and \$7,500. for "Great Expectations," this last representing the high water mark of such voluntary payments Bookman,

WHAT MONEY IS

Balt for the matrimonial book The most effective substitute for

termine. Money is the most difficult root to cultivate

That which women look for while men sleep.

Money is the loudest sound in the voice of life.

What the rich don't need and the poor don't get. A curse to some that have it and a

curse to all that haven't. A provider for everything but happi-

ness, a passport to everywhere but

heaven. The one thing that makes crooked

things look straight and straight things crooked.

That which speaks a language we

few are able to converse.

Purchasing by Scent.

"The nose is a powerful factor in the selection of flowers," said the proprietor of a flower stand. "I keep the doors of this glass case open in all kinds of weather. I want possible customers to catch a whiff of the frathe smell instead of the looks. They will pass a shut-in flower stand day after day and never think of buying anything, but just let them get the odor of some favorite flower and they will go home carrying a bouquet as big as your hat "- New York Press.

Golf Sticks.

the golfer should be on terms of the most complete confidence and intimacy with all the clubs in his long, and particularly the wooden clubs, from which he gets his length. Such confidence cannot be established during the first few seasons of a golfer's experience. It needs a long time and much thought to grasp what are the essential features of a wooden club that make it exactly suited to the peculiarities of a particular player -Fry's Magazine.

The Obliging Bankrupt. ter than the Wall street broker who said to his friend the reporter. "I did not fall until after the evening papers went to press, so that you could have it all to yourself in the morning. To'ne around in an hour or so and I'll give you the figures."

The White Cance.

In the far north there is a superstition in which the trappers and traders armly believe even now, that a white cause, piloted through the beavens by the spirit of an old pioneer, comes for the dying. Metropolitan Magazine.

When there is a man in the house just sick enough to stay indoors it behonves everybody to walk straight, or there is certain to be trouble.—Somerville Journal.

THE HUMAN MACHINE

MAN'S BODY AND IT'S WONDERS OF MECHANICAL DEVICES.

of the inventions of the Day Intringenests on the Clever and Ingentous Devices Registered In Nature's Patent Office.

fearfully and wonderfully is the burnan body made that scientists are beginning to realize that many of the eventions of the day are infringements on nature's patent office. A good deal of trouble and worry in the past could have been avoided had inventors made a careful study of the devices employed in making these human bodies of ours the useful things they are. The principles of the block and pulley or the tackle could have been discovered ages before had the files of nature's patent office been ranancked, for there are several complete pulleys in the body, notably the one which moves the eyeball inward toward the nose.

Engineers made exhaustive tests and experiments before they discovered that a hollow shaft or rod of iron or steel is about twice as strong as a solid one. Yet nature had patented this device in our bones since the birth of Adam and Eve, and every important hous is practically constructed on this principle. The ball and socket of the hip tones were the forerunners of the modern ball bearings, and it was the first automatic olding machine used in the world. The value of air pressure and a vacuum was unknown to man until the last century, but every one of us carried the secret in the air tight hip joint which nature had assigned to leasen the muscular effort to half our legs meright in postmon.

Engineers have made wonderful progress in developi a compound suction and circular pumps, but all of the principles contained in them are found in the heart, and this little pumping machine is still without a rival in the

The principles of the safety reality for steam engines are not so new us they seem. Our human feedles carry with them the first automatic safety valves ever designed. There are me ward of 2,500,000 of them. We call them by the common name of sweat glands. Each such little gland has a safety valve which lets off heat from the body when it gets beyond a safe temperature. We cannot stand a rise of more than 8 to 10 degrees of temperature and live, If therefore the 2500,000 safety valves were closed for twenty-four hours, death would super-

Adam's apple was the first storage cistern ever built, and it works with automatic regularity through health and sickness. It is a most important organ of the body, although for centuries it was considered a superfluous attachment. It regulates the flow of blood between the heart and the brain. When it ceases to operate, somebody dies of apoplexy or a rush of blood to blindfolded wretch before them." When the heart sends up the brain. too much blood to the head, the Adam's apple steps in to check the flow and store it up for future emergencies. If the heart is temporarily weakened or put out of good running order, the blood stored in this cistern is given up and sent to the brain. The perfect working of this little device is apparent when we consider how computafively few die of rush of blood to the brain or from a deficiency of supply.

The eye has a score of small inventions worthy of recording, the ear can all understand, but in which so nearly as many more and the vital organs an equal number. There is the liver with its quarantine station. Let any poisons enter our systems with food and they are immediately neld up at this quarantine station and destroyed by a secret process. It is only when polsons enter in large quantities

that the station cannot handle them. But the stomach co-operates with the grance. Most people buy flowers for liver and intercepts some of the polsons. There are small machines there which manufacture minute quantities of bydrochloric acid from the salts eaten. This sold is made in exact proportion to the amount of food consumed and suffices to destroy the microbes which we swallow. But there is even a third quarantine station located in the mouth. Millions of microbes are of your poor husband grilling down he It is of the utmost importance that destroyed in the mouth daily by the low?" juices elaborated there for this very purpose. If it was not for these three quarantine stations working continuously night and day, we should be killed off by microbes within an hour aft-

er eating a nical. In the ear there is a little device which might have been the original of our modern compressed air inventious | bore! The delicate drum of the ear must have an equal pressure from the outside and the Latin for 'Handle With Care.' inside to receive and transmit the sound vibrations. To make this possible the enstachian tube was decised. Good comrudeship may count for its function is to regulate the air press mad and smash the box."-Philadelmuch. No man ever typided this bet- sure inside the ear. Let it fast to work. and one becomes some deaf.

In the lones of the head there are many little channels indiswed out which are called the semicircular cunals. These causts are filled with fluid lymph. For centuries no one could unconstand their meaning. Some physicians considered them of no use. This tembency to belittle organs in the bosini body whose functions could not ing, innocent betrayed one.-Lady Vlo be explained has characterized more jet Greville in London Opinion. than one generation of savants. Now these peculiar semicircular canals are known to be wonderful little devices to assist us in keeping our balance. They act a good deal as the ballast does on a ship, or, more properly speaking, this the fluid in a spirit level. The brain keeps an eye on this spirit level and is made conscious of the body's relative position. The fluid flaws back and forth in the causts, and when we get

The Stale Bread of Bungary, In Hungary they do not eat fresh

bread. Whether it is because the Hungarians believe in hygiene more than their American or European brothers and sisters or not has never been told. but the Mazyar is partial to state brend, and the staler the better. His "rozskenyer," or ordinary black bread, as it is eaten by the very large majority of the Magyar population, is carefully laid away on a shelf and dug out for consumption months and months after it has come out of the great ovens. If the huge loaf, weighing something like five pounds and for which the Hungarian pays 6 or 7 kreutzer, equivalent to about 3 or 4 cents in American money, has carefully been hidden away for two years, it is considered all the better. The Hungarian never thinks of where the bread is to come from tomorrow. He thinks of where it is to come from next year, for he has at least a year's supply on the shelves. The Hungarian bakes her bread 365 days abend of time. Her Wednesday baking is for the Wednesday of a year to come; ber Thursday baking for the Thursday of

To tut the light in Two.

Professor Victor Hallopeau, member of the Paris Academy of Medicine.

The true secret of long continued, valuable brain work is to cut the night in two. The scholar, the inventor, the financier, the literary creator, should be asleep every hight by 10 o'clock, to wake again at, say, 2 in the morning, Three hours' work, from 2 to 5, in the absolute tranquillity of the allent hours should mean the revealing of new powers, new possibilities, a wealth of ideas. undreamed of under the prevailing sys-

From 5 to 8 or 8:00 sleep again. Taking up then the day's work, the brain will be still saturated with the mental. fruits of the midnight vigit; there will le no effect in putting into practice or carrying further what was planned or begun those few hours before.

The fubit may be hard to acquire. but mechanical means of waking at first will induse the predisposition .-New York World.

The Military Death Sentence. You know how a soldier traiter is put to death," said the colonel. "The traitor stands blindfolded, and half a donen privates shoot at him simultaneously. But perhaps you don't know that each of those privates, though he take the most careful aim. may afterward say without fear of contradiction that the traitor's blood dues not stain his hands. This is the reason. Two of the rides for this ghastly shooting are always loaded with blank cartridges. Then they are shuffled, and no one knows which the harmless ones are. The executioners draw, and each is as like as not to draw a harmless gun. So when they shoot they can solace themselves with the thought that maybe they are only shooting a blank cartridge at the poor

Hans Breitmann's Philosophy.

I have found that if we resolve to be vigorous of body and mind, calm, collected, cheerful, etc., we can effect marvels, for it is certainly true that after awhile the spirit or will does haunt us unconsciously and marvelously. I have, I believe, half changed my nature under this discipline. I will continually to be free from folly, envy. irritability and vanity, to forgive and forget, and I have found, by willing and often recurring to it, that, while far from being exempt from fault, I have eliminated a vast mass of it from my mind. It is certainly true, as Kant wrote to Hufeland, many diseases can be cured by resolving them away. He thought the gout could be .- Letters of Charles Godfrey Leland.

Time to Change.

It was at I table d'hote dinner at a bill station in India that a very young officer just up from the plains found himself seated next to a lady whom he took for one of the grass widows common in those parts. He made himself agreeable, but his neighbor seem ed a good deal out of spirits, so be said sympathetically:

"I suppose you can't help thinking

But the lady was a real widow, and when he learned that he changed his seat.-London Answers.

sparing the Smasher.

Reub lican Campaign Text-Book

A departure has been made in the Republican Campaign Text-Book just issued, in that its contents are wholly devoted to live issues, and these are treated in the briefest possible way, yet comprehensively enough to include all necessary facts and figurer.

First, there is a general statement of the issues of 1906, followed by a brief review of Republican legislation in general and the work of the Fiftyninth Congress in particular. The Railroad Rate Law, Pure Food Law, Free Alcohol Law, Employers' Liability Law and the Meat Inspection portion of the Agricultural Appropriation Law are given in full, as is Chairman Tawney's clear explanation of the approprintions.

The Labor question is next fully presented, followed by Representative Watson's exposition of Anti-Trust proceedings. About one hundred pages are given to the Tariff, Agriculture and Manufactures, and the tables showing the various phases of industrial activity. Among other subjects treated under the tariff are:

Protection and Free Trade, Customs Revenue, Foreign Commerce,

Home Market and Internal Trade, Wages and Prices, Export Discounts, Reciprocity. Free Hides,

Revision, etc., etc. Some half hundred tables give official and authoritive figures down to the lastest possible date. The work of the president and administration is then briefly presented, the condition and status of the Philippines, the Panama Canal, the Navy, Postal Service, Irrigation, etc., etc.

The President a letter to Representa tive Watson concludes the work, which has a copious index of over a dozen

Scattered throughout the book are quotations from President Roosevelt and other Republican leaders. Among d other Republican leaders. Among Hanna's speech where he used the Cheney & Co., doing tusiness in the "stand pat" expression, it being the city of Toledo. County and State aforeonly instance in the Text-Book where said, and that said firm will pay the page is given to Mr Bryan and his sum of One Hundred Dolars for each view, with the comments of the New and every case of Cattarrh that cannot Pork World. A so-called "Prosperty be cured by the use of Hall's Catarrh Postscript is added, giving treasury conditions treasure that cannot be cured by the use of Hall's Catarrh Cure.
